

MUHAMMED THAHSEER

AI/ML Engineer

Malappuram, Kerala, India | +91 7592072319 | zacthahseer123@gmail.com

Nationality: Indian | Availability: Immediate

SUMMARY

AI Engineer with 3 years of experience building LLM-powered applications, agentic AI systems, and computer vision pipelines. Skilled in RAG, vector databases, and deploying ML models with FastAPI & Docker on cloud platforms.

WORK EXPERIENCE

AI Engineer, Equipo Health

Oct 2025 - Present

- Built an AI chat plugin using **LangGraph** and **Claude 3** for patient management.
- Developed a Automatic AI calling system for Doctors regarding Insurance Eligibility check.
- Developed multi-agent systems with **Strands** and **Bedrock** for real-time collaboration.
- Worked with Playwright for Meeting Notetaker Automation.

AI Developer ,Pixl.ai

Apr 2024 - Jun 2025

- Worked with **YOLO**, **Paddleocr**, **Donut**, and **OpenAI** to build a pipeline in software.
- Implemented **fine-tuning** of LLMs such as **Llama2**, and **Tinillama** for chatbots and pipeline building of software.
- Worked with **Gliner** for **NER**. Created a **chatbot assistant** that can schedule Meetings.

AI/ML Trainee, Cubet Technolabs

Nov 2023 - Apr 2024

- Worked in an LLM-related document-based chat application for question answering.
- Implemented audio recognition feature with the help of the **Whisper** model.
- Used **Faiss**, **OpenAI**, **Llama2**, **Langchain** in the project and **FastAPI** for deployment.
- Researched about **Mamba**, **Llama** and other **multimodals** to implement in the application.

AI/ML Trainee, Brototype

Nov 2023 - Apr 2024

- Worked on multiple algorithms in classification, regression, and deep learning neural networks.
- Developed self-projects such as image captioning and next-word prediction.
- Performed exploratory data analysis (EDA) on various datasets for information extraction.

SKILLS

- **Technologies:** Agentic AI (LangChain), RAG, Embeddings, Vector DBs (FAISS, Pinecone, Chroma), NLP, Computer Vision, Generative AI, Data Analysis, Forecasting, Statistical Analysis, TensorFlow, PyTorch, Scikit-learn, Asyncio, Pandas, NumPy, OCR
- **Languages:** Python, Java, SQL
- **Deployment & Services:** FastAPI, Docker, AWS (S3, EC2), Azure Databricks, Kafka, AWS Lambda, CloudWatch, AWS Connect, AWS Bedrock, Elevenlabs Agents.
- **Data Structures:** List, Tuple, Set, Dictionary, Linked List, Graph, Tree

RECENT PROJECTS

MEETING NOTETAKER

- Developed Vica, an AI-powered meeting notetaker using **FastAPI**, LLMs, and speech-to-text transcription models for automated meeting transcription, summarization, and action item extraction.
- Integrated **Playwright** and **Rust APIs** to automate meeting bot operations, audio capture, and meeting lifecycle management across online meeting platforms.

AGENTIC AI INSURANCE ELIGIBILITY VERIFICATION SYSTEM

- Worked with the **Strands** framework and **Amazon Bedrock** LLMs, integrating **ElevenLabs** to enable agentic AI voice automation for insurance eligibility with multi-step reasoning and intent-driven conversations.
- Worked with **AWS Connect**, **Lex**, **Lambda**, and **ElevenLabs** to manage real-time voice flows, session handling, early disconnect detection, automated callbacks, and post-call processing.

CHAT PLUGIN FOR PATIENT MANAGEMENT

- Built an AI-powered chat plugin using **LangGraph** and **Claude 3** for patient data.
- Created navigation **tools** enabling doctors to move between pages via natural language queries.
- Implemented patient summary **analytics** for quick health insights and reporting.
- Deployed the solution using **FastAPI** and **Docker** for scalable performance.

INVOICE PARSER

- It is a application which can extract Information in a structured format such as JSON.
- Implemented Prompt Engineering with the help of multiple models such as **Gpt-3.5 turbo** , **Gpt4-o** , **Gpt4-o-mini** and **Gemini 1.5 Pro**.
- Deployed the entire application using **FastAPI** and **Docker**.
- Also used several technologies like **Pdfplumber**, **AWS OCR extract**, **Chain of thought prompting**, etc.

WHIZZ.AI

- Developed a document based chat application using **Llama2**, **OpenAI**, **fastAPI**, **Langchain**, **Faiss**, **whisper** and **ChromaDB**.
- Implemented **RAG Prompting** for getting answers when we ask a question that is in the uploaded dataset.

EDUCATION

BSc Mathematics, Calicut University

Jun 2019 - Mar 2023

Higher Secondary - Biology Science, KBHSE

Jun 2017 - Mar 2019

CERTIFICATIONS

- **Voice Agent** development using OpenAI models with the help of Livekit Framework.
- **Python** Core with **MySQL** from SINET Institute Perinthalmanna.
- **Machine learning** with Python by Cognitiveclass.ai, powered by **IBM**.
